Possible Problems: Insect: Mites, aphids, snail and slugs are possibilities

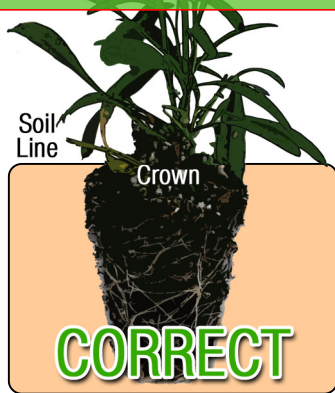

Habit: Spreading ground cover

Diseases: Root rot, if they don't have good drainage

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

Brilliant yellow, fern-like leaves are streaked green and erupt in fragrant purple flowers. This wonderful mutation of C. 'Blackberry Wine' is one of the few Corydalis that does not go summer dormant. Its vigorous cascading habit makes it an excellent ground cover and looks great spilling out of baskets and over banks. A stunner in the spring garden! Takes heat and humidity!
