Hardiness Zones: 4 - 8

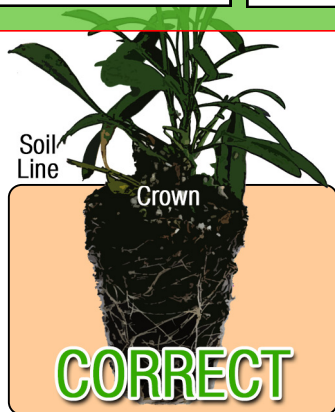

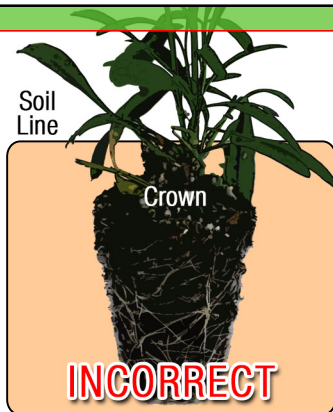

Possible Problems: Insect: Aphids are possible pests  
Diseases: Wilts, root rots and leaf spots are possible with poor drainage or growing conditions

Habit: Arching clump

Day Length for Flowering: Day neutral

## Description

The first gold foliage Dicentra spectabilis with true red flowers. Developed from purposeful breeding, all other gold foliage varieties have been mutations. The stems are strong and upright, the flowers are large and numerous but the color... WOW, brilliant red with a touch of unusual orange! A great container habit and is long lasting in the garden; a great improvement over the still popular 'Gold Heart'. Exceptional vigor.

Do NOT bury the crown of the plug
